PROFESSIONAL EXPERIENCE

As a Frontend Engineer with over six years of experience, I specialize in building scalable web applications using Angular, React, and .NET. Currently at Suddath Relocation Systems, I lead frontend development efforts, focusing on creating user-friendly interfaces and optimizing performance. I also architect cloud solutions on Azure and mentor junior developers, promoting best coding practices.

I am passionate about developing efficient, user-focused web applications that drive business growth and enhance user experience. My diverse industry experience allows me to adapt and deliver tailored solutions that meet various client needs.

Fluent in four spoken languages, I enjoy connecting with diverse teams and professionals worldwide, bringing a multicultural perspective to problem-solving and collaboration. Always eager to learn new technologies, I actively share ideas and insights with others in the industry.

PROFESSIONAL EXPERIENCE

Suddath Relocation Systems, Jacksonville, FL (Remote)

Angular Engineer | November 2019 – Present

- Led the design and development of high-performance web applications using Angular and .NET, improving load times by 20% and enhancing operational efficiency.
- Managed the migration of legacy systems to the latest Angular versions and NET Core, ensuring seamless transitions and optimized performance.
- Mentored junior developers, conducted code reviews, and enforced best practices, fostering a collaborative and high-performing team
- Architected and deployed scalable cloud solutions on Azure for business-critical systems.

Otakuchan (Anime Shop Online) (Remote)

React Developer | October 2017 – November 2019

- Designed and developed key UI components with a focus on accessibility standards using React, ensuring a smooth and inclusive user experience.
- Collaborated with engineers to optimize GraphQL data handling, reducing load times and improving overall application performance.
- Prioritized responsive design and optimized applications for mobile and desktop devices.

AniList (Remote)

React Developer | November 2016 – October 2017

- Built reusable React components to streamline development and maintain a consistent user interface.
- Created responsive UIs that worked seamlessly across different screen sizes, improving user experience on mobile and desktop platforms.
- Developed and maintained unit tests to ensure the stability and reliability of the application.

Freelance Frontend Engineer (Remote)

Freelance Frontend Engineer, January 2016 – November 2016

- Built custom websites using WordPress, Node.js, React, and Angular, delivering tailored web solutions for various clients.
- Deployed applications on AWS, ensuring scalable and efficient hosting solutions.
- Focused on SEO strategies to help clients improve online visibility and drive traffic to their websites.
